
SFP GROUPE

Soudure Fusion Précision | Tivaouane, Senegal

Industrial project profile

Positioning

SFP GROUPE is a Senegalese industrial business project currently being incorporated. Operational launch is in preparation. This profile describes planned services, not contracts already performed by SFP GROUPE.

Five core trades

Industrial welding • Metal fabrication and platework • Industrial piping • Industrial maintenance and installation • Steel structures.

Target sectors

Mining and quarries, oil and gas, energy, cement and heavy industry, agribusiness, construction and infrastructure. Complementary solutions may be provided with qualified technical partners.

Founder's experience

The project is led by Ismaila Diaw. His personal professional experience spans Senegal, Mauritania, Burkina Faso, Guinea, the Central African Republic, Angola and Canada. These are not SFP GROUPE contractual references.

Quality, health, safety and environment

The project's QHSE approach emphasizes risk assessment, work planning, permits to work, weld quality, traceability and environmental protection. A QHSE plan, version 1.0 dated September 2026, is available on the website.

Capabilities in preparation

An operational base, workshop, equipment, technical team and partnerships are envisaged progressively. This document does not assert quantified capacity, current qualifications or immediate availability.

Skills development

The project plans welding and related-trade training and upskilling. Regulated qualifications are issued by authorized bodies.
